

DEFIANT[®]

INSECT SCREENS

DEFIANT

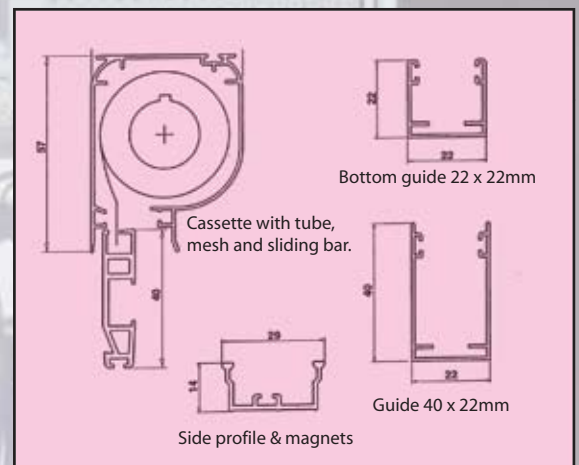

DEFIANT

All Defiant Insect screens are carefully built to exacting standards, giving years of trouble-free service. The superior design features and quality components enable them to be confidently specified for the most demanding environments.

The provision of insect screens at door and window openings is a legal requirement in areas where food is prepared for public consumption, such as restaurants, works canteens, schools, hospitals and all public buildings. Defiant screens comply with the relevant Health and Safety regulations, and all frame sections are manufactured from hygienic white powder-coated aluminium extrusions. The PVC-coated glass fibre mesh is rot-proof and flame-retardant.

The greatly enhanced interior environment provided by Defiant screens is an important contributor to the quality of life in many situations, both residential and commercial. The screens are unobtrusive, with simple and attractive detailing and quality components.

Defiant insect screens are available through a nationwide network of distributors, with experienced installation and service teams providing an unrivalled level of support.

Defiant Insect screens- size limitations

Screen	Min width	Max width	Min drop	Max drop	Max m ²
F30	800	1600	400	2500	3.5
